

VascuLab is Australia's first dedicated surgical and angiography training facility. Offering a state-of-the-art, purpose-built facility providing a platform to conduct medical research, and develop surgical skills.

Situated within the 'biotech corridor' in Parkville, VascuLab is flanked by Australia's premiere research and academic institutions including University of Melbourne, Royal Melbourne Hospital and Peter McCallum Cancer Centre. The facility is 1km from the CBD and only 30minutes from Melbourne's International Airport.

Understanding education is at the heart of the VascuLab vision. We offer meeting spaces including conference room and board room with AV capabilities and a state-of-the-art laboratory space equipped with an extensive array of specialist equipment.

Anatomy Lab

A fully certified school of anatomy with the Department of Health and Human Services, VascuLab offers the opportunity to obtain hands-on experience by working on anatomical specimens allowing for a more precise and realistic approach to developing surgical techniques.

In Vivo Lab

Advance your vascular medicine and general surgery skills using in vivo models. These innovative methods and techniques can improve and expand the basic understanding and challenges of human health. VascuLab supports approved projects for both education and research with an approved and ethical mindset.
